Dear Valued Customer,

Over the past couple of years, our company of nearly thirty years has been moving into the digital world with our software. Unfortunately, it has not been without some bumps and bruises along the way.

We recently switched to software designed specifically to meet the needs of a septic company which performs routine inspections per an annual service agreement.

Over the past couple of years, our technicians have emailed your inspection reports to the email we have on file. With this new system, they will continue to email your inspection reports, but they will also TEXT the summary of the report to the primary contact's cellular phone. (only one cell phone number is allowed for this option). You may opt out of the text messaging services if you do not want to receive text messages from our company. For those of you that prefer receiving a paper copy, we can mail your inspection upon your request.

Please see the contact page (Page 2) to update your contact information for this property, Or follow this link to fill out the on-line form.
